

PRODUCT SPECIFICATION SHEET

Glow: BUG

Rev. C3

Designed to look like a sparkle of Fireflies, the Glow: Bug is a fibre optic outdoor lighting feature that is designed to sway gently in the wind.

Consisting of a 5mm diameter UV stable acrylic rod, the Bug is held in place by an engineered plastic ground spike. The end of each rod is illuminated with a small fibre optic sparkle bullet. Grouping these rods together produces the firefly effect.

The length of the Bug can vary to your specification from a minimum of 750mm to a maximum of 1500mm, increasing in increments of 250mm.

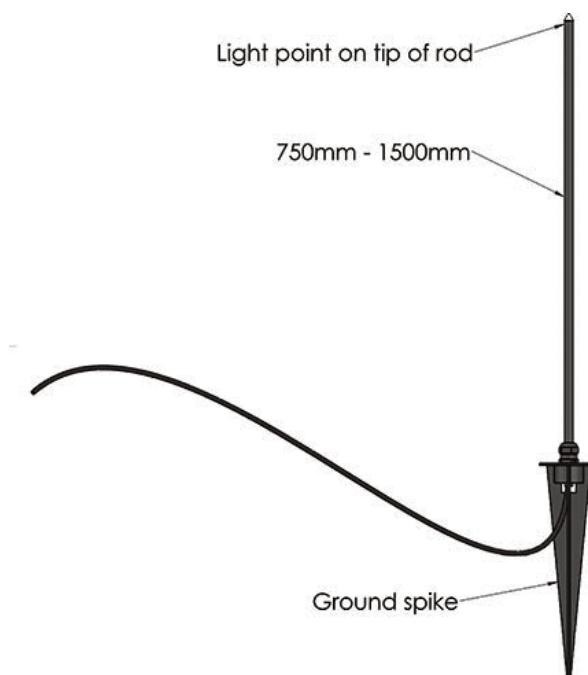

Since the Bugs are all illuminated by one, or multiple, fibre optic light sources they can take advantage of all of the colour changing and twinkling effects and control options that our light source range offers. A twinkle effect light source is particularly effective with this lighting range as it enhances the effect of the sparkles and makes the overall appearance more lifelike.

TECHNICAL INFORMATION

Material	UV stable acrylic
Rod Finish	Black, matte effect
Effects	Colour change (with compatible light source)
Rod Diameter	5mm
Min. Length	750mm
Max. Length	1500mm (increases in 250mm increments)
Fibre	FSPT-1-1 end lit PMMA fibre
Mounting	Ground spike
Max Rods per Light Source	480

ORDERING CODES

Product Code	Fixture Type	Overall Length	Mounting
UFO-GLB-750-GS	Glow: BUG	750mm	Ground Spike
UFO-GLB-1000-GS	Glow: BUG	1000mm	Ground Spike
UFO-GLB-1250-GS	Glow: BUG	1250mm	Ground Spike
UFO-GLB-1500-GS	Glow: BUG	1500mm	Ground Spike
